

# Shadow kites

Marya Zatsepina, Pedro Vale, Denis Tkachenko, Emily Höpfinger

## How to include, what is already there

The current public space gives us different varieties of nature, by taking usage of them we are able to improve the place.

The water, wind and trees are important aspects, present in this park. It is also noticeable that the center of the place has no shadow, making it a very inhospitable place to stay for long hours.

## Brainstorming ideas

By investigating the area, we got several ideas on how to use the present elements, listed below there are some examples:

- Creating shadow over the space;
- Barefoot path to the river (sensory experience);
- Cutting the bushes with different forms;
- Painting the benches representing the different elements.
- Botanical garden with information about the ecosystem at the Neckar river

## Selected Idea

In order to solve the issues of overheating, we create beautiful shadows in the space, to make it more pleasant.

This lead to the proposed idea of hanging something between the trees that could simultaneously cover the area, produce beautiful sounds and make the site more attractive.

# Shadow kites

Marya Zatsepina, Pedro Vale, Denis Tkachenko, Emily Höpfinger

 There are several ideas for „shadow kites“ in which is going to be included such things as:

- Wind music
- Fringe
- Ribbons
- Transparent colourful windows
- Bells
- Lights
- Mirrors

 All of them could have different shapes, materials (even reused ones), sizes and colours. Shadow kites can be crafted by kids with their parents during the workshops.
